

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

PREFACE

THESE graded word lists contain words arranged by grades and in classes. The graded lists are eight in number. Each grade has a required list and an optional list, excepting that in the eighth grade the optional list is omitted, since a general review is desirable in this grade. In addition, there is a supplementary list for such use as opportunity and need may suggest.

The lists have been made up by a committee of principals, with the assistance of class teachers, in the Town of Norwalk, Connecticut, and constitute a practical requirement within the limits of what elementary school pupils may reasonably be expected to accomplish. The required lists represent the minimum attainments. The optional lists, of words often as important as those in the required lists, represent a medium requirement.

Care has been taken to avoid useless and unusual words.

In spelling and syllabication, we have followed the International Dictionary.

GRADED SPELLING LISTS

GRADE I

REQUIRED — 180 WORDS

a	man	see	sees	me
I	the	we	run	runs
with	us	men	he	boy
boys	girl	girls	she	dog
dogs	kit'ty	like	likes	milk
good	and	drink	drinks	my

TARR AND McMURRY NEW GEOGRAPHIES

TWO BOOK SERIES

FIRST BOOK, \$.65 SECOND BOOK, \$1.10

THE SAME IN PARTS

FIRST BOOK, Part One, \$.40 SECOND BOOK, Part One, \$.65
FIRST BOOK, Part Two, .50 SECOND BOOK, Part Two, .65

MODERN PEDAGOGICAL INTERESTING

Improved size and shape, $7\frac{1}{4}$ by $9\frac{1}{2}$ inches. Easily handled and more durable.

Home Geography is made prominent, thus proceeding from the "known to the unknown." Actual experience forms the final basis for all study of geography.

Causal sequence instead of a bare recital of unrelated facts.

Sufficient detail for narrative style and vivid picturing, making a strong appeal to pupils' interest.

Marginal headings help the pupils to study clearly by points. Facts are kept in proper perspective. Tarr and McMurry's NEW GEOGRAPHIES are by far the most teachable.

New maps and illustrations. The FIRST BOOK has twenty-three colored maps; the SECOND BOOK, forty. The numerous illustrations are artistic, every one is properly related to the text and scientifically placed. The line of text is unbroken.

The books are strongly and attractively bound.

BAKER AND CARPENTER

Language Readers

LEADING FEATURES

1. **Teachers agree** as to the value of good literature as the basis of the English work. But the classics are often either not related at all to the work in expression, or the relationship is indicated in a vague and desultory fashion.

The Language Readers make the relationship close and vital, without rendering the work in expression pedantic, or killing the enjoyment of the reading.

2. **Each Reader** has some dominating interest in its subject-matter.

In the first two books, the main problem is to teach the beginnings of reading, which must be sacrificed to interest and simplicity, and these books deal with simple story and poetry, mostly of folk-lore and child-life.

In the third book, the dominant element is the fairy-story and the folk-tale.

In the fourth book, the animal-story and the tale of adventure are given the leading place.

In the fifth book, the great myths of the world, the hero-stories of the nations, are retold.

In the sixth book, a selection of stories, poems, and essays serves as an introduction to general literature.

3. **The standards of good literature** and the interests of the normal child have been kept in mind.

Great care has been taken that the books shall be **good readers**, independent of the language work introduced.

The language work has been so handled as not to make it obtrusive in appearance or impertinent in comment.

4. **In grading** the reading and language work, the editors have had the assistance of able and experienced teachers from both public and private schools.

5. **Illustrations** have been freely used.

Color work—by the newer processes—adds special charm to the five lower books.

ATLANTA

The Modern English Course

By HENRY P. EMERSON, Superintendent of Education, Buffalo, New York,
and IDA C. BENDER, Supervisor of Primary Grades, Buffalo, New York.

BOOK I—ELEMENTARY LESSONS IN ENGLISH

Cloth, 12mo, ix + 246 pages, illustrated, 35 cents net

BOOK II—A PRACTICAL ENGLISH GRAMMAR

Cloth, 12mo, xiv + 400 pages, 60 cents net

These books aim to give the young—

- (1) Ability to express their own thoughts and to understand the thoughts of others.
- (2) Clear insight into the structure of the English sentence.
- (3) Effectiveness in the use of language.
- (4) Appreciation of its higher uses in literature.

The illustrative sentences in both books have been selected with great care from standard literature, and they are valuable in themselves for the information or the suggestive thought they contain.

The definitions are short, clear, concise, and within the comprehension of the pupils. As far as definitions are given in Book I they are identical with Book II. In general the two books are consistent; there are no contradictions; they are harmonious in aim, in method, in explanation, and in definition.

In the Modern English Course the study of grammar is not neglected and much attention is given to composition. In both grammar and composition, the aim has been to create on the part of the pupils a better appreciation of what they read, a larger power of connected thinking, and greater facility in expressing their thoughts.

The study of grammar is made a real help in oral and written composition.

- (1) The explanations are simple, lucid, and easily understood.
- (2) The definitions are short, clear, concise, and within the comprehension of the pupil.
- (3) The selections and illustrative sentences are taken from standard literature.
- (4) The books contain many exercises designed to correct common errors in English.
- (5) They aim to teach the child to think, observe, and see things, and with the thinking to express the thought.
- (6) They avoid the diffuseness and vagueness of language books, and yet guard against a merely technical presentation of the principles of grammar.
